

Amber Alert

2nd issue for April 2015 Issue No AO39

An Official Film from Saint Laurent is to be released in May in the USA which may boost sales and result in more of these garments reaching the marketplace.

Saint Laurent Jacket (not a YSL)

The lining runs a little in solvent but should not be a real problem, what can catch you out is that the dye in the lining runs profusely in water, so it is almost impossible to remove water borne stains without ruining the garment, also you will have the same problem with pre-spotters containing water.

Care Label Instructions

- Do not Wash,
- Do Not Bleach,
- Do Not Tumble Dry,
- Iron At Maximum Sole Plate temperature of 110°C
- Dry Cleanable in All Solvents

Additional care precautions

Avoid water based treatments on staining that could touch the lining because of the very loose colour which will then run into the other fabrics used in the make up of the garment.

AMBER ALERT

"Obviously we cannot say that other items of the same type will have the same problem, or that a different method of cleaning may have had a more satisfactory result, because this was not tested, but we advise caution and that you carry out your own test if you are going to clean this type of garment. "
