Versace Coat

As you can see the interlining has broken up in Perc and has also made the surface of the fabric sticky, it is from Hong Kong.

The interlining is polyurethane. The print on the label is hardly visible, but the instructions are to dry clean only, the outer shell is wool

AMBER ALERT

Obviously we cannot say that other items of the same type will have the same problem, or that a different method of cleaning may have had a more satisfactory result, because this was not tested, but we advise caution and that you carry out your own test if you are going to clean this type of garment. "
